High Quality

# Embedded Systems Hardware & Software Engineering Services and OEM/ODM

COMPUTEX2014
Third Hall
Booth No.G0355

R&D engineering services for various application

◆ Offers R&D and mfg services in a short delivery time from proto type to mass production.
◆ Provides **one-stop service** including hardware, software and cabinet.
◆ 42,000 Printed Circuit Board Design Experiences.

● Reduces prototype development time by 30%
（compared with our own records）
We can offer quick prototype development service by customizing based on our own reference platform

● R&D experiences for various applications
We have developed various applications such as Video equipment, Information communication equipment, In-vehicle equipment, industrial equipment, etc. for many customers including Denso, Canon and Toshiba.

● 42,000 Printed circuit board design experiences
We can offer high density and highly multilayered board design services considering SI/PI/EMI/electromagnetic field simulation.
Designing more than 1000 boards a year
